Engineer Mahendra Raj:
With a portfolio of over 250 projects and a career spanning nearly six decades, from Indian Independence to the time of this paper's writing, there is no simple explanation for how Raj works with or how he works with them. Each project displays a different facet of how Raj works with architects. The first was Raj's close collaboration with Pritzker laureate, Balkrishna Doshi: Tagore Memorial Hall in Ahmedabad, completed in 1965. Second, the Hall of Nations and Halls of Industries, designed with Raj Rewal and Kuldip Singh, and completed in 1972 in New Delhi.

Last, the Hindon River Mills, designed with Kanvinde and Rai, and built in 1973 in Ghaziabad. Each project shows a visionary engineering solution where the structure makes a bold statement and becomes integral to the architecture.

Ar. Rohit Raj & Ar. Vandini Mehta on Er. Mahendra Raj

Rohit Raj Mehndiratta graduated from School of Architecture CEPT, Ahmedabad, India with a distinction in his thesis and received a S.M. Arch. (Masters of Science in Architecture Studies) degree in Architecture and Urbanism from Massachusetts Institute of Technology (M.I.T) in 2002.
