CELEBRATING THE LEGACY OF MASTERS

Indian architectural fraternity needs no introduction to Anant Raje (1929-2009). He was a revered architect, teacher, intellectual and perfectionist. It will not be exaggerated to call him Louis Kahn of India. Anant Raje was invited by Louis Kahn personally to work in his office in Philadelphia. Raje worked there from 1964 to 1969 in close association with the master architect. Thereafter he established his own practice “Anant Raje Architects” in Ahmedabad but his association with Louis Kahn continued till his death in March 1974. During this period Anant Raje oversaw the ongoing construction of Louis Kahn’s Indian Institute of Management in Ahmedabad.
